CR NITROGEN

NITROGEN (as polymer) %w/v
32.0%

This product contains 62.9% w/w total solids.

Improve the nitrogen efficiency of tech grade soluble fertilizers by alternating with Control Release Polymers up the dripper.

GENERAL INFORMATION:

Control Release products contain nutrients in polymer and/or chelate form to provide maximum root absorption when applied through fertigation systems.

RECOMMENDATIONS:

For best results alternate CR products with conventional granular fertilizers such as calcium nitrate. This will improve the nutrient efficacy (so you can lower application rates) of conventional soluble fertilizers as the CR polymer residues in the soil will reduce leaching of nitrogen and other soil mobile nutrients.

COMPATIBILITY:

All CR formulations are compatible with each other & through any fertigation system. Please contact SJB Tech Support before mixing CR products with non-CR fertilizers.

SAFETY DIRECTIONS:

Avoid contact with skin and eyes and avoid breathing in vapour or spray mist.

APPLICATION RATES:

General Rate: 20 L/ha every 14 days which is equivalent to 60 kg/ha UAN.

For best results alternate CR NITROGEN with conventional nitrogen sources or supplement with foliar LIG-NIT sprays @ 10 L/ha. After flowering or when crop has optimum leaf area & vigour, CR NITROGEN can be used to maintain crop health while not promoting excessive vegetative growth that can be detrimental to crop quality.

CONDITIONS OF SALE:

The Manufacturer/Distributor warrants that this product contains the active constituents and polymer/chelating compounds, as specified, and it is for the purpose of supplying nutrients and/or correcting appropriate nutrient deficiencies, when used in accordance with directions under normal conditions of use. No one, other than the officer of the Manufacturer/Distributor, is authorised to make any warranty, guarantee or direction concerning the product as the time, place, rate of application and other conditions are beyond the Control of the Manufacturer/Distributor.
