KICK START P

A new liquid phosphorous seed dressing for cereal & pulse crops that's easy to use & cost effective

Guaranteed Analysis

		% w/v
Phosphorous	(P) as ligno-polyphosphate complex	12%
Zinc	(Zn) as lignosulphonate chelate	1.5%
Copper	(Cu) as lignosulphonate chelate	0.12%
Molybdenum	(Mo) as ligno-molybdate complex	0.06%

Increases your farm profitability without significant cost

- ▶ User friendly liquid formulation that can be applied with pickles
- ▶ Earlier germination and better crop establishment
- ▶ Improved economic viability of crops (increased yields & protein levels) in dry as well as good years.
- ▶ Better crop utilization of soil/fertilizer nutrients & moisture.
- ▶ Significant reductions in granular phosphorous fertilizer rates.
- ▶ Cost effective at around \$5/ha

KICK START P is most effective on soils with high phosphorous retention (lock-up) such as calcareous high pH soils and acid soils with high iron, aluminium, manganese & organic matter levels.

KICK START P Trial Results in Wheat, Beulah 2000

Treatment	Yield	Protein	Screenings	Yield increase as a % of Control
Control	3.86 T/ha	9.7%	3.5%	100
KICK START P @ 8 L/Tonne	4.08 T/ha	10.4%	3.5%	106

APPLICATION: Cereal & Pulse Crops - 8 L/Tonne seed
