A zinc seed dressing that's easy to apply!

LIG-GRAIN

Guaranteed Analysis(w/v)

LIG-GRAIN (Zn 8.9%, Cu 0.12%, Mo 0.06%)

LIG-GRAIN + Mn (Zn 6%, Mn 3%)

Increases your farm profitability without significant cost

- ▶ Contains high quality amino acid chelates for optimum seed absorption & nutrient availability
- ▶ User friendly liquid formulation that can be applied with pickles
- ▶ Earlier germination and better crop establishment
- ▶ Improved economic viability of crops (increased yields & protein levels) in dry as well as good years.
- ▶ Better crop utilization of soil/fertilizer nutrients & moisture.
- ▶ Cost effective at around \$5-6/ha
- ▶ Independently & scientifically proven to increase grain yields

Unlike many other seed dressings, LIG-GRAIN does not coat the seed, but rather nutrients are absorbed into the seed. This greatly reduces the abrasiveness often associated with seed coatings and therefore has a lesser effect on seed flow rates through air seeders & combines.

Treatment	Rate (L/T seed)	Grain Yield (T/ha)	Yield Increase (%)	Grain Protein (%)	Grain Screenings (%)
Control	-	3.65	-	10.99	0.88
LIG-GRAIN	8.0	4.41	17.23	10.49	0.79
Teprosyn Zn	4.0	4.38	16.67	10.42	0.92
K-Complex	4.0	3.65	0.0	10.76	0.98
Super Symcoat	4.0	4.21	13.30	10.45	1.00
Standard Error (%)		0.45	-	0.32	0.17
Coefficient of Variation (%)		9.13	-	2.89	21.8

APPLICATION: Cereal & Pulse Crops - 8 L/Tonne seed
